

FOR GREEN TECH FUTURE!

WASTE MANAGEMENT – TASK SHEET

How Much Waste Do You Produce?

Plastics are omnipresent. We can find it in the ground and in the seas, it gets into our food and water we drink. **According to a WWF report, we eat five grams of plastic every week. That's all it takes to make one credit card!** By 2050, we will have more plastic waste than fish. Can we do anything about it? Is this not a problem to be solved by large companies and governments? Of course not! Change your lifestyle, take conscious action and encourage others to act.

YOUR TASK:

1. Count how much plastic you make each month, year and your lifetime.
2. Present the steps you can take now to reduce your plastic consumption.
3. Inspire others to act. Share your ideas with your family and friends.

Share your results with us. We will publish the coolest ideas on our website and in the Social Media.

1 Count how much plastic you make each month. Find out your Plastic Footprint.

Click on the link: <https://www.omnicalculator.com/ecology/plastic-footprint> and complete the test.

How big is your plastic footprint?

Per month: Kg

Per year: Kg

Per your lifetime: Kg

2 Present the steps you can take now to reduce your plastic consumption.

Plan 3 actions that you can implement in your daily life to help you reduce your plastic consumption.

(1)

(2)

(3)

3 Inspire others to act. Share your ideas with your family and friends.

And now the most important part. Every single act counts and if there are many of them, together we can influence how big corporations and governments operate.

How can you motivate others to reduce their plastic consumption?
