First Green Camp in Schwerin (Germany)

Date: May 07 - May 09, 2019

Venue: Technology Center Schwerin (TGZ), Hagenower Straße 73, 19061 Schwerin

Assignments for the participants:

- **Business card:** Preparation of a business card by each participant (name, country, age, hobbies and interests, answer to the question: Ecology means to me?). Business cards will be placed in a visible place by everyone!

- **Team building:** “Team identification” by developing a catchy group name and team logo (corporate identity)

- **Study case:**

1. Visit of the company WEMAG AG (a regional Green Electricity Supplier) to get an insight into their business and activities <https://www.wemag.com/>
2. Case introduction to the participants by representatives of the company WEMAG AG

The main challenge for the participating teams will be to search for an efficient way or an innovative new approach regarding storage technologies and reliable power supply by renewable energy sources like wind energy, solar energy, etc.

3. Developing an approach/solution to the assignment, working in teams (solution could be built on the “Design Thinking Model”)

4. Short group presentation with a potential solution for the assignment – pitching event

- **In between a short break with fun:** Hunk of junk event and prototyping - Students will design a product made from random scrap and discarded items
